Password

Phone Number

cloudestimator.cloudamize.com/estimator

Step 2: Select Data Center region

1. Sign Up

2. Billing Details

3. IaaS settings

4. Add Accounts

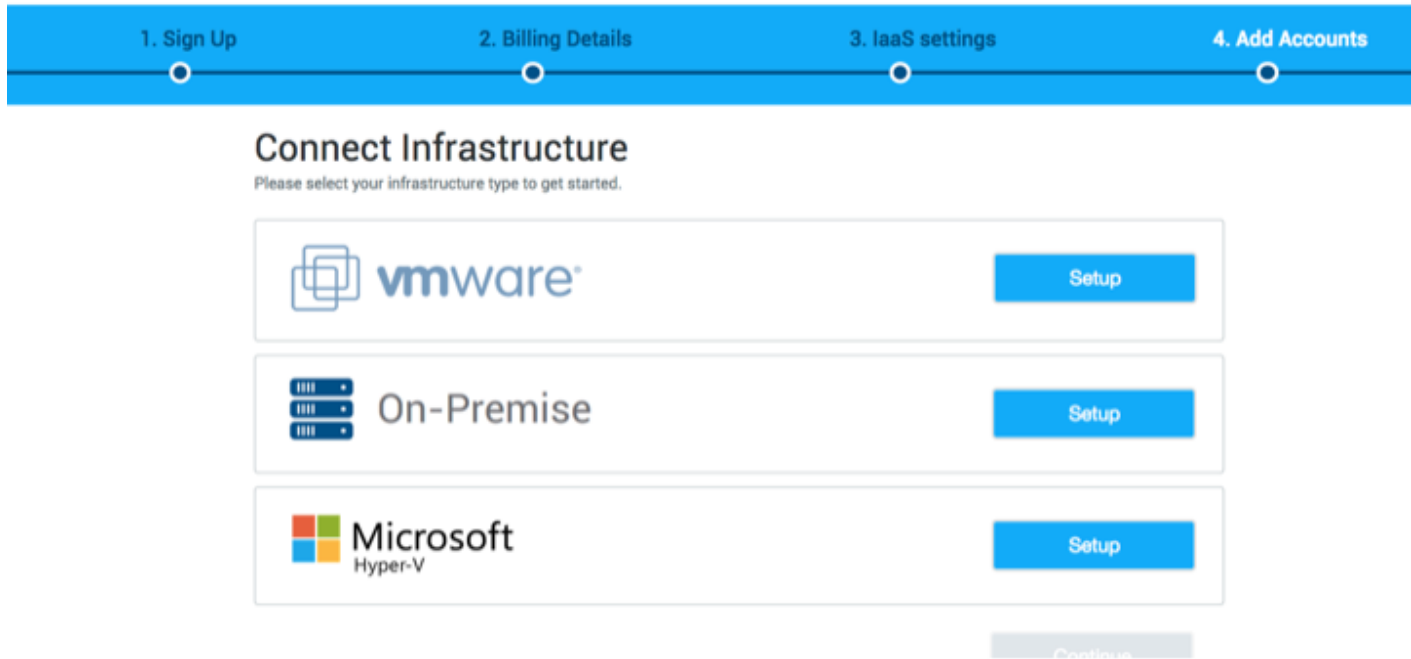

Select Regions

Please select a region for each IaaS provider

- None
- US East (N. Virginia)
- US West (N. California)
- US West (Oregon)
- South America (Sao Paulo)
- EU (Frankfurt)
- EU (Ireland)
- Asia Pacific (Tokyo)
- Asia Pacific (Singapore)
- Asia Pacific (Sydney)

Step 3: Select Microsoft Hyper-V to download windows client.

Setting Up Hyper-V Host

Step 1: For Hyper-V hosts, click on the Windows tab for GUI installation instructions or the command line installation instructions. You will be installing the Windows agent on your Hyper-V (i.e. hypervisor) host. You will need to open outbound port 443 to address: agent.cloudamize.com (FQDN).

For command line installation instructions, please download the installer first then execute the command as an administrator on your Hyper-V (i.e. hypervisor) host.

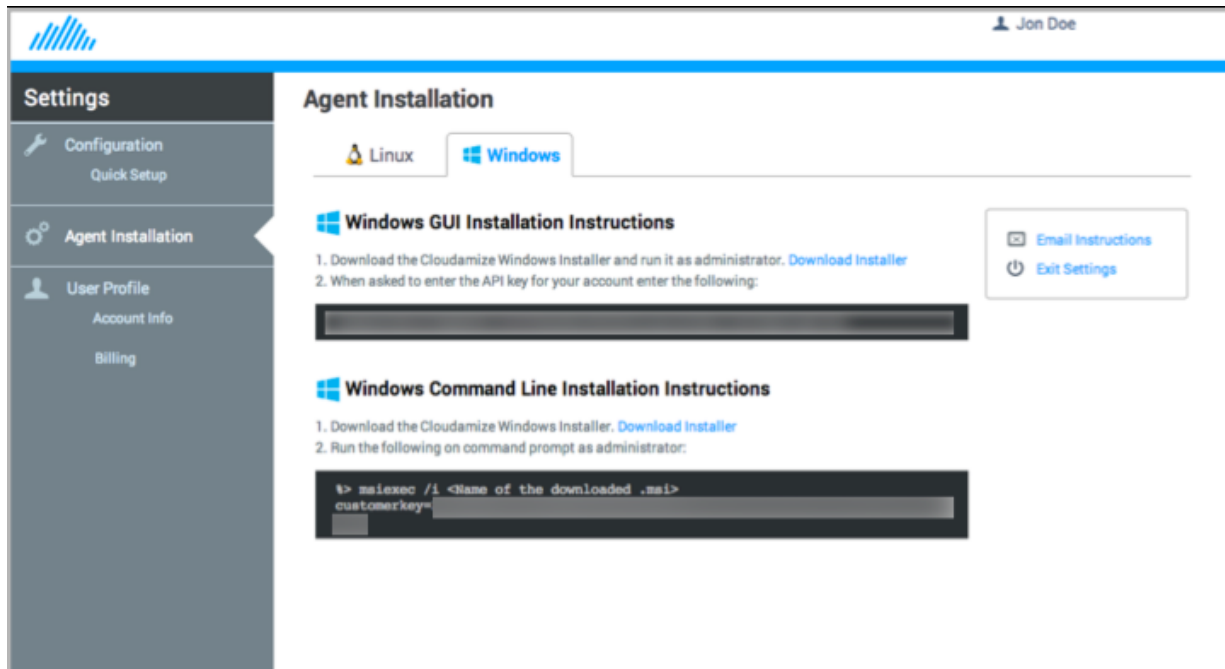

For GUI-based installation instructions, please download the installer first and run the installer as an administrator. During the installer setup, you will be prompted for a Customer Key that is provided here. Enter the customer key that is given on the screen.

To have instructions sent to you via email, simply on the “Email Instructions” link.

Step 2: If the machines on which the agents are being installed are not allowed Internet access, open the firewall to allow outbound connection to 443 to the Cloudamize server.

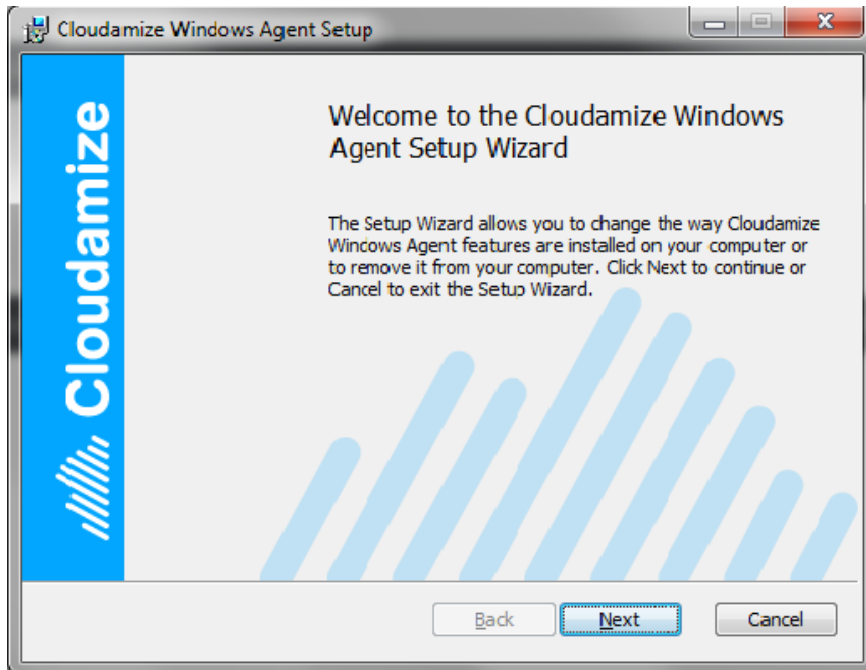

Firewall Rules:

Allow outbound access to port 443 to IP address 104.197.11.97

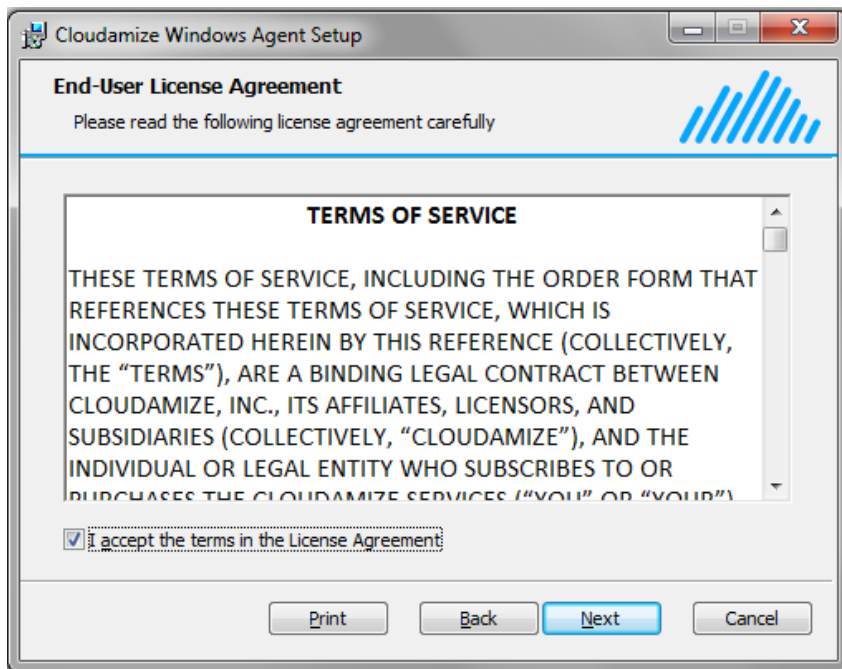

The screenshot shows the 'Agent Installation' settings page for a Windows operating system. The page is part of a web application with a user profile 'Jon Doe' in the top right corner. A left-hand navigation menu is visible, with 'Agent Installation' selected. The main content area is titled 'Agent Installation' and has two tabs: 'Linux' and 'Windows', with 'Windows' being the active tab. Under the 'Windows' tab, there are two sections: 'Windows GUI Installation Instructions' and 'Windows Command Line Installation Instructions'. The GUI instructions list two steps: downloading the installer and entering an API key. A text input field is provided for the API key. The command line instructions list two steps: downloading the installer and running a command prompt command. A code block shows the command: `%> msixec /i <Name of the downloaded .msi>` followed by a prompt for the customer key: `customerkey=` and an empty input field. On the right side of the GUI instructions, there are two buttons: 'Email Instructions' and 'Exit Settings'.

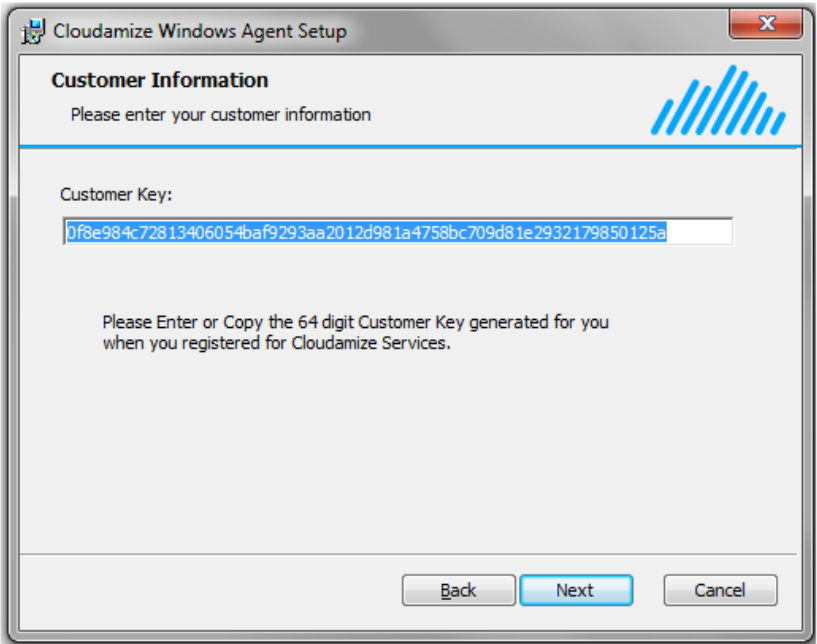

Step 3: Once the installer is downloaded, open and click “Next.”

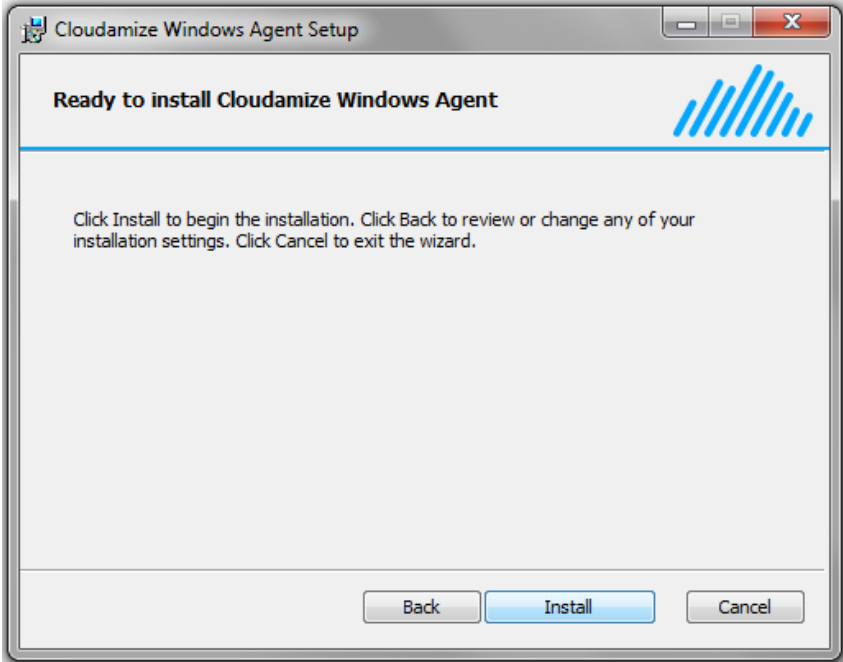

Step 4: Accept the End-User License Agreement and click "Next."

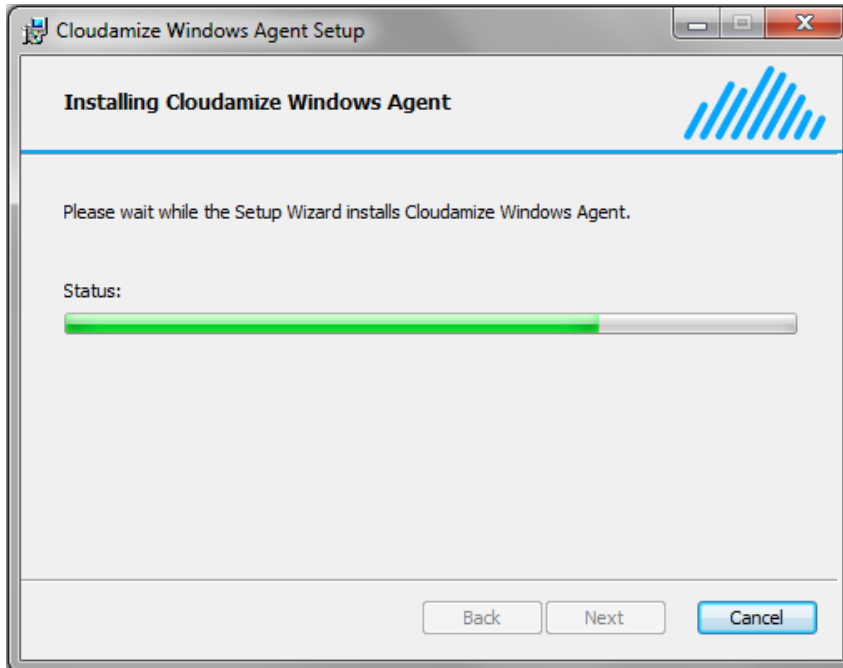

Step 5: Enter the 64-digit customer key previously generated for you.

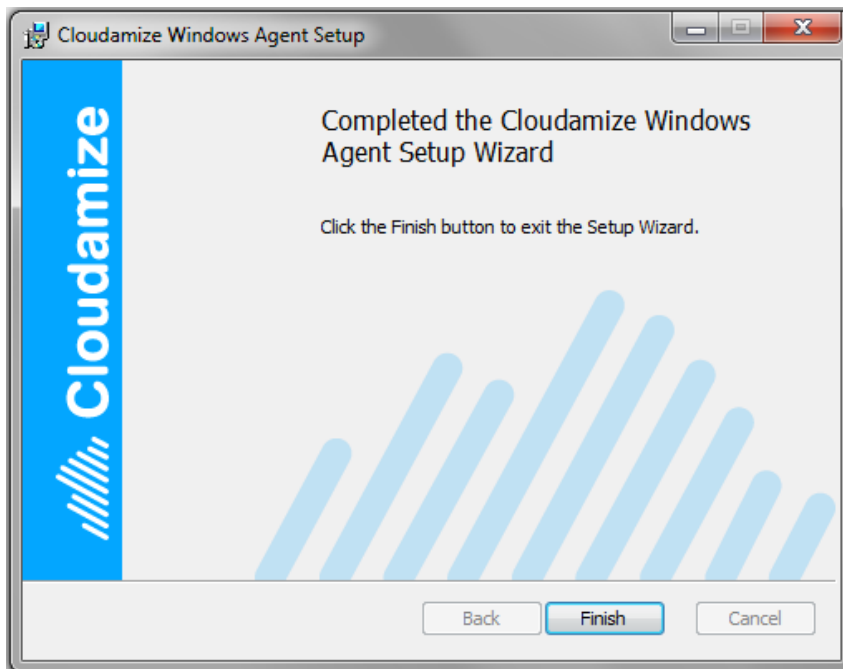

Step 6: Click “Install” to begin the installation.

Step 7: A status update screen will show you the progress of the installation. A status update screen will show you the progress of the installation.

Step 8: Once the installation is complete, click “Finish.”

Uninstall: If you wish to uninstall the Agent go to your Control Panel, select Programs and uninstall the “Cloudamize Windows Agent” program.
